AVIATION

- 5th Year of the Program at Canyon
- Industry Careers (projected shortages)
  - Pilot
  - Air Traffic Controller
  - Aviation Maintenance Technician
  - Aerospace Engineer
- Students can become licensed pilots by 17th birthday
Math Question of the Week

• Weekly SBAC released question for any student through math class or library
• Weekly drawing for small Canyon prizes
• Monthly drawing for big prizes!
• Mr. Svoboda answers the week’s question on the video announcements and the winners are announced.
• Approximately 500 correct answers submitted weekly

---

**Math Question of the Week**

3/18/2019 - 3/22/2019

Name: [Name]
Grade: [Grade]

Answers should be submitted to your math teacher or to the box in the library by Friday, March 22 by 2:45 pm. Limit: One entry per week.

- A store sells used and new video games. New video games cost more than used video games. All used video games cost the same and all new video games cost the same.
- Omar spent a total of $84 on 4 used video games and 2 new video games. Sally spent a total of $78 on 6 used games and 1 new video game. Janet has $120 to spend.
- Enter the number of used video games Janet can purchase after she purchases 3 new games.

Used video games

5 used video games

**Explanation:**

I made Omar’s spending into an equation (4x + 2y) and made Sally’s spending into an equation (6x + y). I isolated the “x-value” in Omar’s equation, and substituted it into Sally’s equation (6x + y = 78). Then, I solved for the “y-value” for the new equation. After, I plugged in the “y-value” and the “x-value” Janet can purchase 5 new video games she could purchase.
