##### **DISTINGUISHING CHARACTERISTICS**

This position classification requires subject matter expertise commonly associated with middle school teaching and instruction. Directly related teaching and instruction experience is required to perform problem analysis using prescribed principles, methods and concepts. A teacher in this classification performs decision analysis and makes decisions of considerable consequence, in determining how best to aid students in the learning and behavior modification process. The level of instruction is frequently based on the educational or social deficiency of the group or of a particular individual. Emphasis is on the methodology of instructing “at risk” students rather than on the routine presentation of subject matter. The functional role of this position classification requires the application and interpretation of data, facts, procedures and policies. The incumbent meets frequently with school administrators, other teachers, internal staff and members of the community to communicate information, data and alternative problem solutions.

This position classification performs light work, but does require walking and standing for extended periods and may occasionally require moving or lifting of up to fifty (50) pounds. This position requires accurate perceiving of sound, near and far vision, depth perception, handling and working with materials and objects and providing oral information.
