

Implementation Journey

An overview of AudioEye's 100 Day Journey to an accessible and usable site. Please refer to this for general checkmark items and milestones along the journey. Checkmark items listed below are worked on throughout the journey, and completed by or around the date listed.

Day 1

- AudioEye JavaScript embedded on site
- Auto Accessibility Scan completed in Digital Accessibility Platform (DAP)
- Compliance Accelerator activated (auto accessibility remediations delivered to site)
- **CTA** visible with **Help Desk** and **Certification Phase 1 of 3** (Milestone reached signified by visual change in Toolbar)

Day 60

- Identified Page Templates
- Manual Accessibility 101 Analysis completed
- Manual AT testing begun
- Majority of WCAG Errors and Risks remediated
- **Certification updated to Phase 2 of 3** (Milestone reached signified by visual change in Toolbar)

Day 100

- Outstanding WCAG Errors and Risks addressed and remediated
- Feedback report identifying any remaining source level fixes provided
- Ally Toolbar complete with **Site Menu, Page Elements Menu, Reader, and Player**
- **Certification updated to Phase 3 of 3** (Milestone reached signified by visual change in Toolbar)
